

MINI IMPORTATION IS

THE NEW

GOLD!

WRITTEN

BY

UGWUOKE AUGUSTINE

Permit me to introduce my humble self once again👉

I'm Ugwuoke Augustine Chimezie, a student of University of Ilorin, Biochemistry department

I'm here with the life aim of being a global blessing to the world

I'm a:

▶ Business coach 

▶ Sales consultant  

▶ Business strategist and analyst  

▶ Mini Importation coach  

▶ Website developer  

▶ Graphics designer 

▶ Content creator 

▶ Online marketer and promoter

▶ C.E.O AUSTINE'S FASHION STORE    

▶ C.E.O SKILLS SET 

PPPS: If you are a grammar perfectionist, you will not

like this book. This is not an academic book so I

cannot be bothered with adhering to grammarian rules. I started some sentences with words like

“because”, “and”, etc. I still cannot figure out when to

use “will” or “would”. Pardon me. This book is about business lessons, not English language.

I can assure you that after reading this book, your life will change for good just like the rest who took action after reading this too, you will at least have something at hand to start up with as you grow up your income value

Without further talks, let's dive in to what I have for you here!

Let's dive in...

Thank you for purchasing this book. I really appreciate the fact that you trusted me with your money. I won't disappoint you with boring theories and lengthy text instead I will just go straight to the point.

For proper understanding, take your time to read this. Repeat again till you are able to fully digest the content, then you can kick-off the procedures a step at a time. If you need clarifications at any point, don't hesitate to contact me (message me via WhatsApp) during working hours for support.

After going through it at once, please drop your review and let's know if the information provided is useful or not

NOTE!

If this is your first time hearing mini Importation or you have little or no idea about what mini Importation is all about. Go here and read my presentation before coming back to read this ebook. You need to understand the basis of mini importation before reading this ebook.

[Please click here](#)

NOTE!

ABOUT 1688

1688.com

As I said in the introductory class, It is a b2b (business to business) site i.e Other merchants and wholesalers buy there and sell on sited like Amazon and alibaba even on jumia. I don't know if anyone here have tried to order any product shipped from abroad on jumia. Most especially wristwatches. If you track your product, watch well and you'll observe that the product is coming from China. Most product sold on jumia are gotten from China, 1688 to be precise. You can go online on jumia, search for pictures of products like shoes, bags and the likes and send it to the group and I'll send you the link to the same product on 1688.com. You don't even need that as I'll be teaching you how to source for your goods using picture and word search tonight.

That's all you need to know about *1688*.

Now to the next on the outline which is

HOW TO SOURCE FOR GOODS

Firstly When you open the site 1688.com

This is how the site will look like check the picture below

Now to the next on the outline which is ***HOW TO SOURCE FOR GOODS***

Firstly When you open the site 1688.com

This is how the site will look like

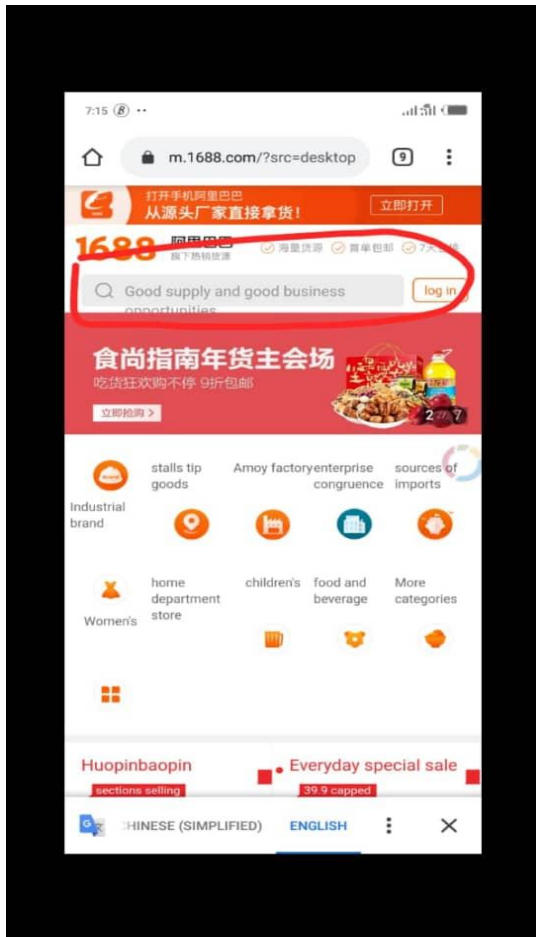

Now we move to *how to source for goods on 1688*

You can source for good on 1688 using three methods

I'll teach you 2 now as these two doesn't require any registration. The third will be taken in the day 2 of the class.

1. Searching using word

When you search using word, you get numerous similar object, like different samples, you might not find the exact product you're looking for. I'll say searching through word is to be used when you don't have a target product you're searching for. Imagine searching for ladies bag on 1688.com. You don't expect there to be just one type of ladies bag on the site. There will be numerous products in the search result which you can choose from.

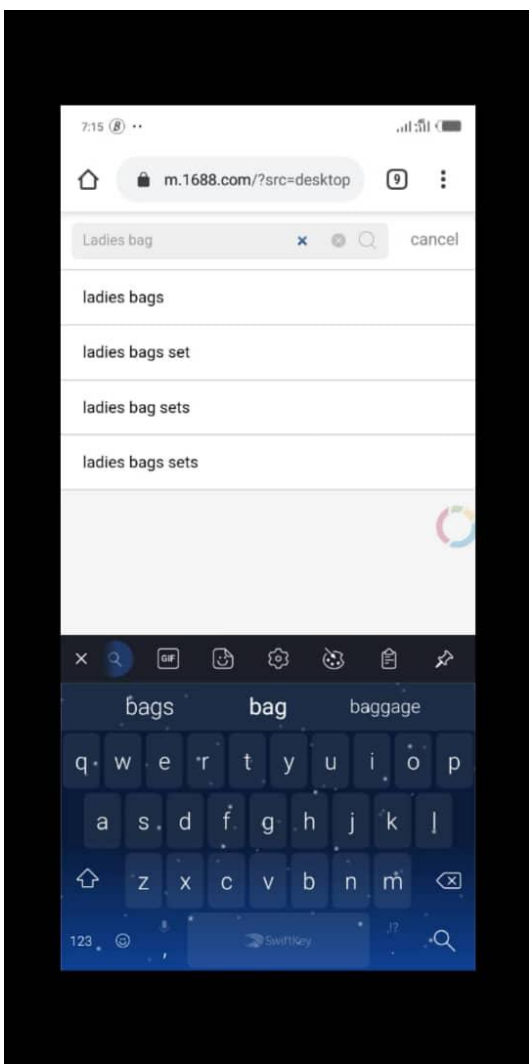

Now to know how to search using word

1. Open your Google chrome browser and then open 1688.com
2. When the site load completely and it has successfully translated, you'll see a space where you can search and then type in the product you want to get
3. You'll have the search result page and then you can survey through and pick which you like (hold on as I'll teach you how to verify product with good quality and also good vendors you can patronize)

That's all about searching through word

Use the below picture to comprehend what I explained initially

From the above picture, what you need to do is just type in the name of the product you are looking for in the circled area i.e the search box

Then you type the name of the item you want to search, like ladies bag, human hair, USB fan, make-up kit, men sneakers etc

When using word to search, you'll find numerous results. As in a lot. You'll have to pick one. There are various manufacturers of ladies bag in China.

This is the reason why I stated up there that you use word search when you don't have a target product.

When you click on any of the product you'll find the necessary details attached to the product

2. Searching through picture

You search through picture when you have a specific product you're searching after. Let's say you got a picture from one of your customer or on jumia or from just any random place and you like it and want to know if it's available on 1688, it's best you use picture search. The search result using picture search brings you various manufacturers of that same product giving you the opportunity to find a cheaper product, and also a better manufacturer of that product. At same time, you're exposed to meeting a scammer, or probably someone offering a fake product. I'll teach you how to verify which product to opt for when we're done with the current topic.

How to search using picture

I'll explain most of this part using pictures

1. Open 1688 using this link

[Click here to view in desktop mode](#)

<https://page.1688.com/?spm=a26g8.m1688.m-common-footer.5>

The desktop mode of 1688 will be shown

2. After the page load successfully (note that it won't translate) you'll see a photo icon beside the search bar. Click on it

3. Select the picture you want to search for and it will automatically search itself

Numerous result will be shown

At this point you need to be careful

The rest will be explained using pictures

This is the picture my customer sent me that he/she needs. What I have to do is click on the link (the one provided above) and follow the steps

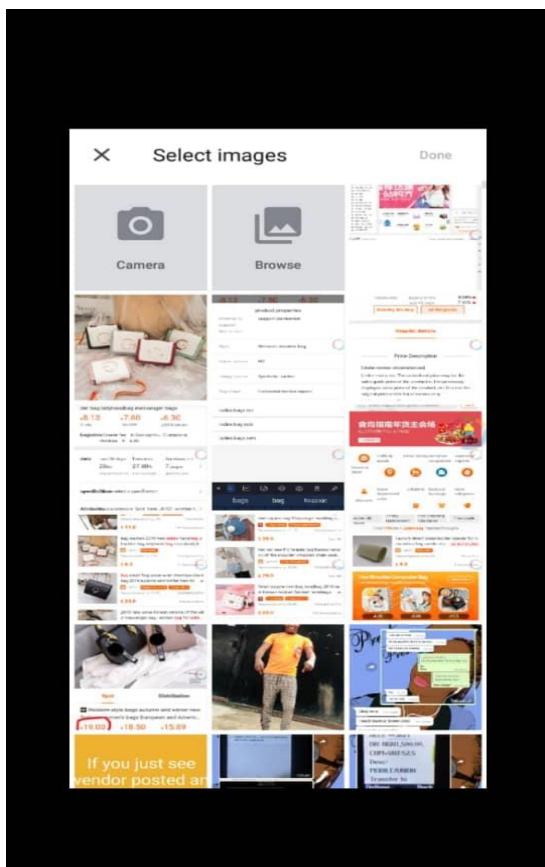

First

Turn your browser to desktop view

Click on the camera icon on the search box

Then it will take you to your file manager or gallery and pick up the picture you are sorting for

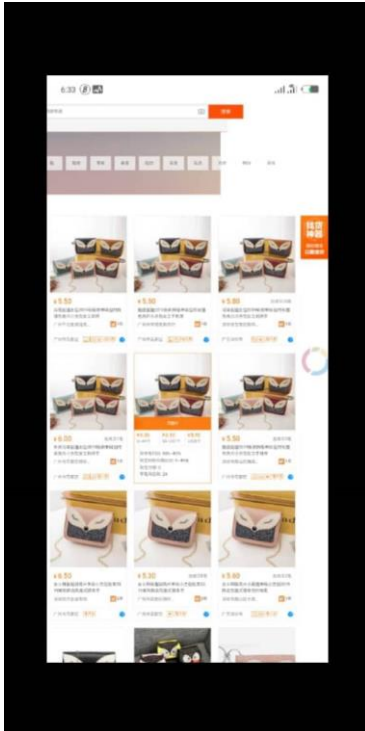

Pictorial explanation Below👉

After you must have changed your browser to desktop view through the link I provided above

Click on the camera icon you see on the search box

Then it brings you to your file manager or location where you pick up the picture of the goods you want to picture search.

After searching this is how your results will look like

In your own thoughts, where do you think you can get picture for picture searching?

The best place to get pictures for picture searching is in jumia. Most products on jumia came from 1688

You can get them on other retail sites too. Konga and the likes. Even on alibaba, alipay, taobao Amazon and Co.

More so, you can join other people pre-order group and then check the hot cake pictures there, save it, picture search, get the details and then show it to your client if they'll like it. If they do, you can proceed to buying it.

How to source for cheap and quality assured goods I.e knowing which product to go for

This is done using picture search. Whenever you do word search, it's advisable you save one of the pictures and then picture search again so as to compare product from different manufacturers

TO DETERMINE THE QUALITY OF AN ITEM

It can be so easy to determine the quality of product and how legit the trader is

Firstly, when you find a product you like, don't just make order from what you see in the picture as the pictures are graphic pictures and the product might not look as real as what is there. Check how long the manufacturer has been trading on the site, how high the turnover is and how much sales he has made in the last 90 days.

I'll teach you how to do this using picture

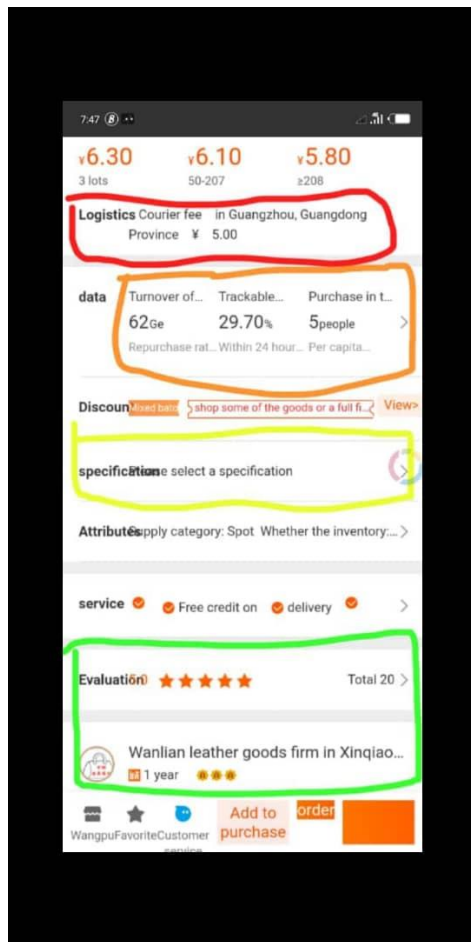

Secondly, Check carefully for the details of the product, check if they meet what you want. In the details under the specification tab, the manufacturer states all the basic things you need to know about the product.

Thirdly, Check the review of people that have ordered that same product and also their ratings. It isn't so advisable to go for product with no review or rating as you can't be so sure of what you're getting. But it isn't bad to get a product without review as the manufacturer might be new on the site and might have not sold so much and also some people who buy might not come back to drop their review.

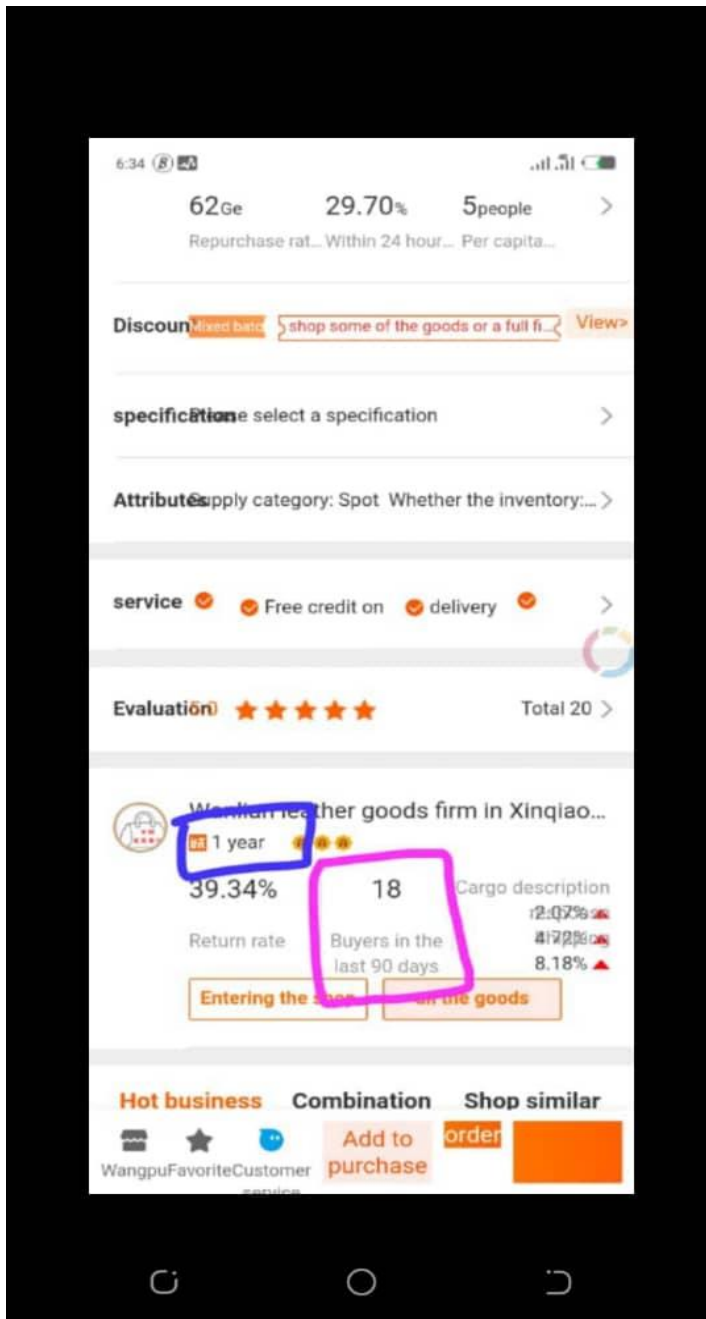

NB. Items with ridiculous prices on them are most times not of good quality. When u see a shirt for about 200naira or lesser it's obvious the quality will be low and sometimes might even be scam but if it has been reviewed by other buyers on the site, it might not be scam and might have good quality

Pictures dropping soon👉 for better understanding

After searching for products and you have clicked on of them for example. When you click on the pictures brought in the search result, it will open a new tab which can be translated to English. This is a vendor. You've seen how much his bags costs. You now know his MOQ(I will talk on this later) and order range and the price for each. We'll be looking beyond these things stated

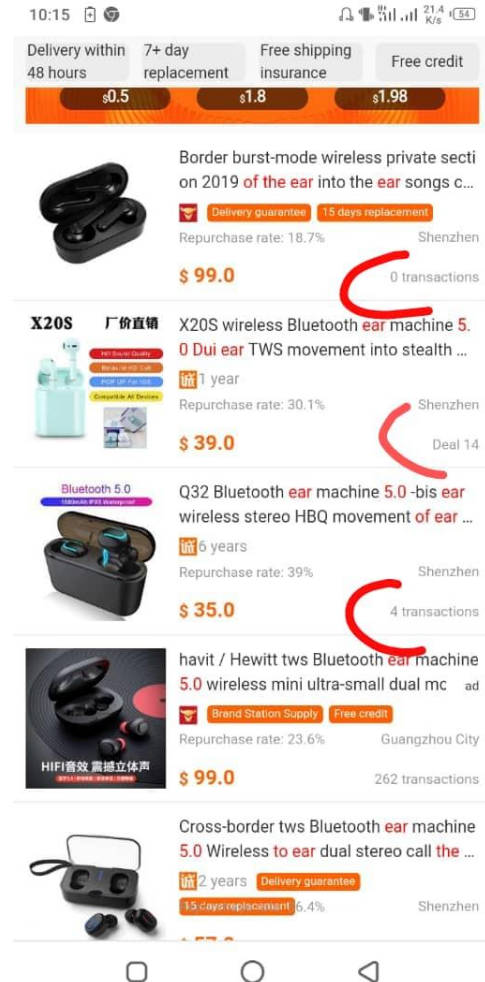

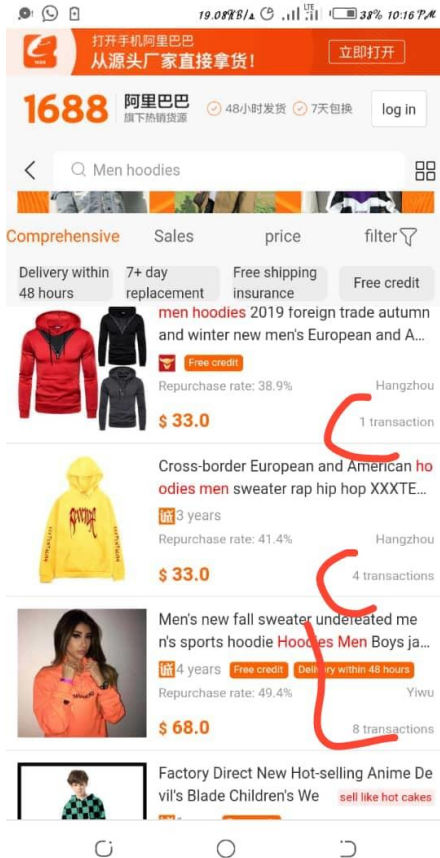

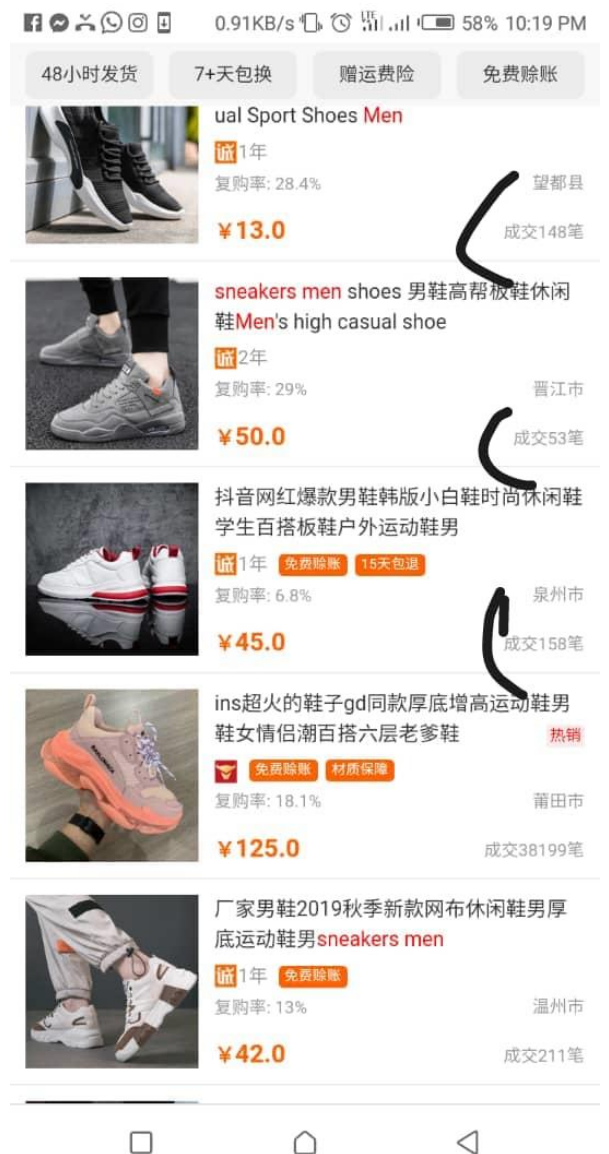

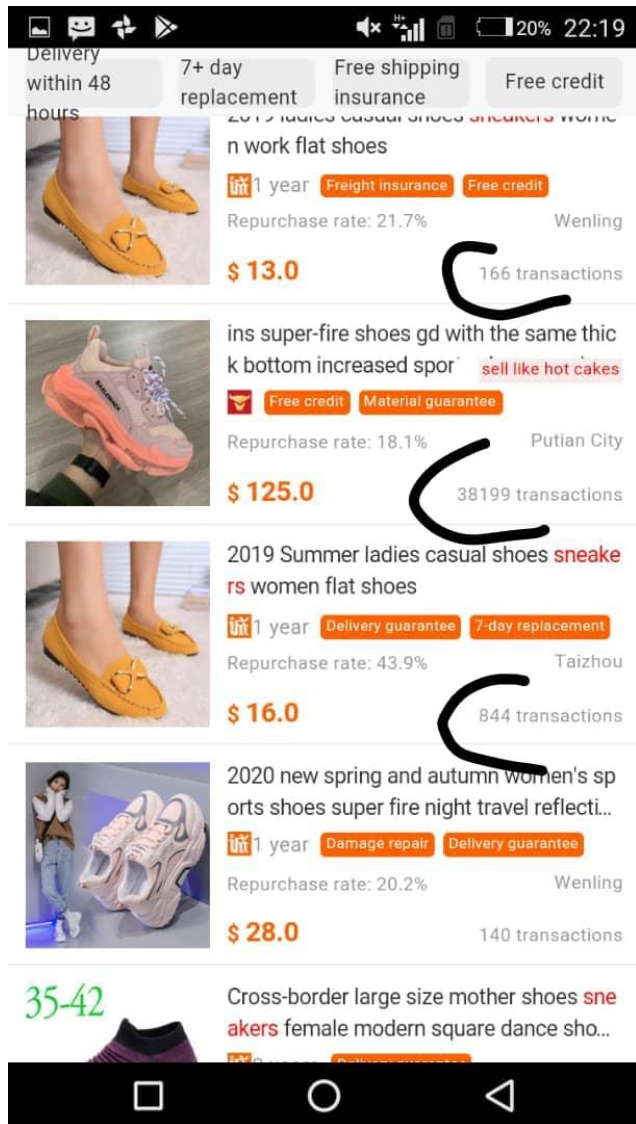

Now look up there. The red part who's the amount the manufacturer will be charging you to transport you good to your logistic company, it can be free at times. The orange shows some other details about the product. The most important thing there is the turnover rate. That's how much pple have repurchased the bag. The yellow shows the details about the bag. The type of material is it made from, the size and other details. The lemon green is the most important here. It gives you a clear insight about the product as it is where people return feedback about the product and shows how well they've rated the product. This vendor courier fee if 5 yuan, his repurchase rate if 62ge, his product is rated 5 star and he has about 20 reviews which you can check out.

This blue mark shows how long the manufacturer has been selling on 1688 and the pink shows how many people he has sold to in the last 90 days. It's also important you note them. This vendor has sold to 18 people in the last 90 days and he has been in the game for a year

How to identify scammers*

Check those images above I circled

Those I circled with black

Means they are legit

Red scammers Don't buy

It's a red flag that your money can vanish

We identify scammers by;

- 1) number of transactions
- 2) reviews
- 3) feedbacks
- 4) star ratings

I have discussed all these earlier

That's all on how to know which product to go for and how to know a legit vendor

And how to identify scammers

Now we have treated

- 👉 how to source goods
- 👉 what product to buy and not buy
- 👉 how to identify scammers

MOQ

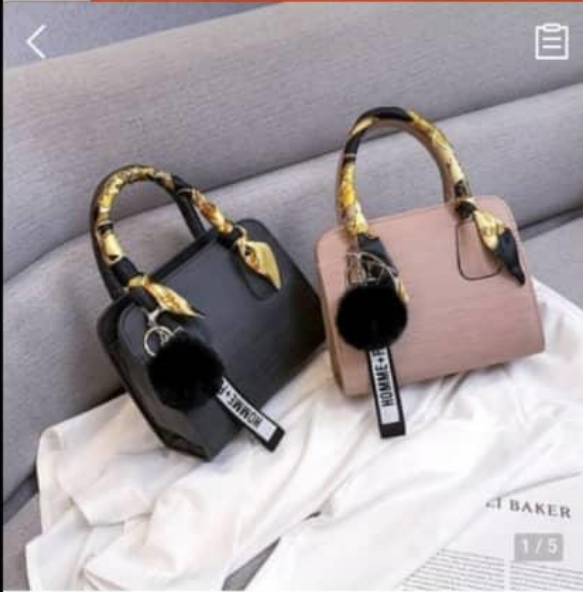

What is *MOQ*???

MOQ means *Minimal Order Quantity*. and most shops write it directly below the picture of the item. It implies that if you're buying anything lesser than the stated MOQ, it might not be delivered.

If the MOQ of a product is 3, it means you cannot order less than 3 pieces of that product. Most times the MOQ of most product is usually 2.

Check picture below for where MOQ is found

6:26 (8) 从源头! 家直接拿货!

镇店之宝

Shop owner pushes hot selling potential models

WangpuFavoriteCustomer service

Add to purchase

order

Look at this. The red circle says from 2. That is the minimum you can order is 2. And that if you're getting just 2, you'll be paying 19 yuan for each.

The red mark states that if you're buying just 2 from this batch, you'll be paying 19 yuan for each. The yellow started that if you're buying between 50 to 999999, you'll be paying 18.50 yuan for each. And the blue mark states that if you're buying up to 1 million pieces, you'll be paying 15.89 yuan for each..

Now we have known all we need to know before ordering a product

As we all know that we can't buy products on the site ourselves

But with the help of an agent

This is because the site is a Chinese site

There currency is Chinese

The sellers are Chinese

And trading with them can only be possible if we have an intermediate. And that is your agent

Your agent will pay for the goods you want to buy

Then procurement and shipping takes place

So before we talk about procurement and shipping

Let's talk about how to send orders to your agent

First thing to do

- search for your product

Either picture searching or word

Which ever way

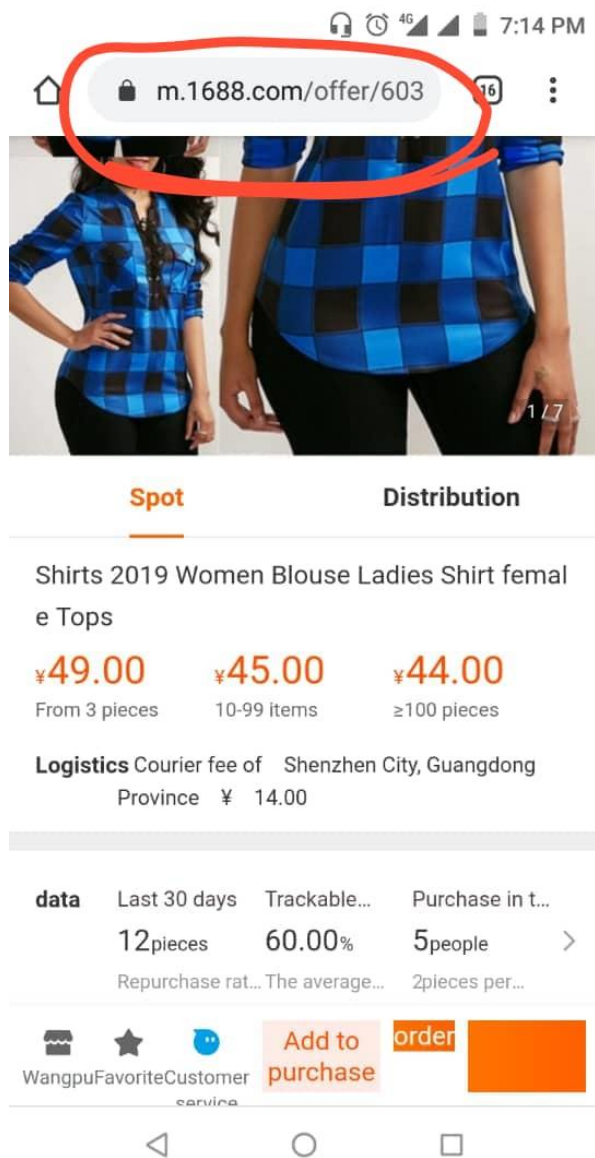

- Click on the product
- Take a proper check to know if the seller is legit or of good quality
- After Clicking on the product from your search list

It will take you the product page

- Copy the link of the product
- the link of your product is located on your browser link

- i.e your url

The picture below will explain better👉

This is what you would copy to buy this top or product

After you copy the link

Then you send to your agent

In this format 📌

Name:

Phone number:

Product name:

Product link:

Quantity:

Size:

You do that for every product and compile them together in a single message

Then send it to your agent

That's *how to send orders*

Next topic🔗

Logistics and Procurement

What does this two terms mean?

Procurement is the act of acquiring, buying goods, services or works from an external source, often via a tendering or bid process. Logistics is a part of supply chain that handles the transport of any material (raw material, finished product) across the supply chain.

So a procurement agent buys for you while the logistics agent do the shipping 😊

You'll need an agent for the procurement of your goods from their Chinese manufacturer and also a logistic company that will help you ship them in too.

You can actually procure your goods yourself and then get a logistic company to do the shipping but if you try it, *It can take your money for vanishing*

Sending order to your agent

- Do with a little pleasantries. Not too much, just minimal.

-Go straight to pasting your links with the specifications.

-Wait for the agent's reply. (Agents reply within 24 hours), then you'll be sent the analysis of your orders and the amount to pay.. You'll also be given the Nigerian account to pay to.

-Make your payment and send the agent your payment proof

-Wait for the agent to confirm your payment too (within 24 hours). THEN YOUR ORDERS WILL BE GOTTEN FROM THE MANUFACTURER AND TAKEN TO THE AGENT'S COMPANY.

THIS IS THE SUMMARY OF THE PROCEDURES CONCERNED WITH CONTACTING THE AGENTS THAT WILL HELP U GET YOUR ORDERS

NOW, AFTER YOUR ORDERS HAVE BEEN GOTTEN FROM THE MANUFACTURER AND TAKEN TO THE AGENT'S COMPANY...

NORMALLY, AFTER YOU'VE PAID FOR YOUR ORDERS, AND THE AGENT THAT HELPED YOU GET YOUR ORDERS HAS CONFIRMED YOUR PAYMENT AND HELPED YOU PURCHASED YOUR GOODS, THE LOGISTICS WILL CONTACT YOU THEMSELVES (Isabella or Annie)

All you have to do is follow up your agent to know how far they've gone with ordering your good.

Now contacting the Logistics agent that will help you get your orders shipped, this is where the *Types of Shipping* comes in.

We have 2 types of Shipping on NBC:

● NORMAL SHIPPING and

● EXPRESS SHIPPING.

YOU'LL GET TO CHOOSE WHICH TYPE OF SHIPPING YOU WANT

EXPRESS SHIPPING is faster than *NORMAL SHIPPING*

EXPRESS SHIPPING is also more expensive than *NORMAL SHIPPING*

After they've calculated the total weight of your goods, they'll let you know what it is and how much you'll be paying for shipping

The weight of your good determines your shipping fee. That was why I said it in the introductory class that you should always opt for products that are light weighted

NORMAL SHIPPING takes about 14-15 days to arrive and ***EXPRESS SHIPPING*** takes 3-4 days to arrive...

I'll tell you the prices of each.

👉 for Express shipping

\$8/kg and #500 Naira/kg customs clearing

3-4 DAYS delivery

👉 for Normal Air Cargo \$5.2/kg and #370 Naira/kg for customs clearing

13 - 15 days delivery

👉 Normal Air Cargo for battery goods is \$5.3/kg and 370 naira/kg for customs clearing fee.

13- 15 days delivery

With this, you should be able to calculate your shipping cost yourself if you know the total weight of your goods.

EXPRESS SHIPPING IS MORE EXPENSIVE BUT FASTER DELIVERY

NORMAL DELIVERY IS LESS EXPENSIVE BUT TAKES LONGER

Notices: Supplier Local Shipping (shipping of goods from the factory to the warehouse in China) takes about 2-4 days for the goods to get to the china warehouse.

The shipping i.e the arrive date of your goods start counting the day the goods leaves the warehouse.

1 Yuan — 55naira (for now)

1dollar — 363(for now)

HOW TO CALCULATE YOUR ORDERS

Simply follow this to calculate any of your order.

let's say, you want to buy 20pieces of a particular product that costs 50yuan andexchange rate is #55 per yuan.

$55 \times 50 = \#2,750$ - $2,750 \times 20 = \#55,000$

another way to do this is by going to Google and type 'how much is 50 yuan tonaira or how much is 2750 to naira.

****Reasons why some agents may ignore your messages*👉**

- Your agent will not reply your messages if you come to his or her dm to bombard him with questions you should have gotten answers to here

- if You don't know all these I have just explained to you earlier

Most especially procurement and shipping

Go back and study very well before you contact any agent

Agent contact link

Agent WhatsApp number: [2349039774885](#)

Untold secrets about mini importation

A lot of people go into mini importation without considering some important details. Mini Importation is far more than what you think it's

Before going into mini importation

It's necessary to decide a niche or category to work on.

There are various categories of mini importation business

Ranging from things you can import

I.e Fashion items, kitchen utensils, home appliances, office appliances, electronics and lots more

Many people think mini importation is all about importing bags and shoes. But it's far more than that

There are a whole lot of things you can import as an importer other than bags and shoes or any Fashion related product.

If you want to do well in mini importation business, it's advisable to look for a niche where people pay less important or concerns on and then leverage on it. But you need to make sure the market also craves for it. And who are your Market? Your market are your Audience, your customers, those you want to sell your products to

So firstly, you need to identify a problem them render or provide a solution to solve that problem. By so doing, you are distinguishing yourself from the crowd.

That brings us to hot selling products, I use to say it to people including my students that there's not nothing like hot selling products. Every product is hot selling depending on the people you are marketing it to.

Example: A teeth whitening product can be regarded as a hot selling product. But wen it's been marketed to the wrong set of people then it's no longer a hot selling product.

Not everyone needs a teeth whitening product. So you need to market it to the people who needs it

Same goes for a weight lose product. It's only a hot selling product if you are marketing it to the right customers i.e those who suffer from obesity or in want to reduce their weight.

So you need to get that.

So doing well in mini importation business require you to first

- look around you
- look for a challenge or problem People are facing
- then import a product that will solve that problem
- and you will make it big in mini importation

Other sites you can import from yourself apart from 1688.com

Lazada.com.my

Lazada is the number 1 shopping destination in Southeast Asia. It is very safe to shopping for people who want a secure, reliable and effortless shopping experience. Get the best deals through their official mobile apps and websites anytime, anywhere, and enjoy multiple payment options including cash-on-delivery, extensive customer care, and Buyer Protection. Not only in Malaysia, their website is well known at countries like China, India, Singapore, China and Philippines.

Example of products are mobiles and tablets, computers and laptops, consumer electronics, cameras, home appliances and more over.

Zalora.com.my

Zalora is one of the leading online fashion destination in Malaysia. Plus, they also the largest and fastest growing fashion =focused e-commerce site in Southeast Asia. For now Zalora are available at Singapore, Indonesia, Malaysia & Brunei, the Philippines, Thailand, Vietnam and Hong Kong. Zalora is a tough competitor for Lazada.

If it was your first visit to their website, they will be assisting you through the shop step by step to complete the purchase quick and easily. They do provide 'flash shipping' that means ship out orders on the same day. You will be finding popular brands like Nike, River Land, New Look and etc.

Superbuy.my

Superbuy.my is an online shopping mall in Malaysia where you can buy a vast range of products at very competitive rates. The website also offers thousands of product reviews which users can read before buying a product on the website.

They offer electronic products such as computers, cameras and laptops as well as phones and tablets to its users. Other popular categories of products include Arts & Collectibles, Books, Automotive & Industrial, Flowers & Hampers, Sports & Outdoors and Toys & Games among many others.

Importing from Malaysia, use lazada

Up next!! 

Let's talk about online business

Now that you can import with the use of an agent

So after Importating your goods

What do you do next

You sell right?

Or you market your items

That brings us to online business

What can one sell online??

This question deals with passion and mostly your audience..

You can't expect me to start putting Turkey gowns of 50k on my wall and expect me to get customers(maybe if I run a sponsored ad Sha) but my audience are students, youths , young ladies that can't afford items higher than 30k(designers though) but they will gladly jump on items as low as 2k.. you need to understand your audience first before jumping into the market if not you'll be merely wasting data..

The answer to passion. I love watches, good bags, fine wears. Because of my love for it, I know where and what people are after.. I can't start selling hair cause I go taya, when I don't even know much abt it, or beauty product(I imagine myself selling make up items and the way people will Waka pass my status cause I won't be able to sell right, me that don't even Know my powder color)

The DOS and DON'Ts in online Business

DOS:

1. Be consistent

2. Build a personal relationship with your customers, not Everytime official talk.. try to play with them, ask abt their kids, infact call them just for laughs..
3. If you are like me that find it difficult to chat, call.. or drop vn when you can.. Better still get a customer service agent.. your customer service can be a relative or friend, you don't have to pay salary.
4. Be accountable to your customers..
5. Run adverts as frequent as possible.

And lots more

DONTS

1. Never say *sorry* or *honestly* when haggling prices with costumer..

E.g

Customer: how much is a pair of this show

You: 8000ma

Customer: let's do it for 6500

You: sorry but that is the price or To be honest with you that's the price..(this is very wrong, what are you sorry for or why the honestly??? Be straight with the price) instead reply with *That's the price ma*

2. Avoid the use of unnecessary stickers and emojis..

3. Stop doing discount sales Everytime, today *cybermonday sales* tomorrow *discount sales"?* Next tomorrow *flash sales* and so on.. your potential customer will render you as unserious.

How to start mini Importation business with little or no money at all!

There are two main ways one can start mini importation business even without capital

1st

By doing what we call dropshipping

2nd

By doing what we can pre-order

Let me explain in detail

▪ *Dropshipping*

Dropshipping is a business model which you can run on your store without ever holding any inventory. Once you have made a sale your supplier will ship your products from their warehouse, straight to your customers doorstep. You will never need to worry about storing, packaging or shipping your products.

How Does the Dropshipping Business Model Work?

There are three key players in the dropshipping business model: the manufacturer, the retailer (you) and the customer.

The manufacturer's role in a dropshipping business model includes creating products, carrying inventory, shipping products to customers on behalf of the retailer, replacing defective products, and restocking products. They sell products to the retailer at wholesale prices assuming the risk of unsold inventory.

In the dropshipping business model, the retailer, you, sell the manufacturer's products on your website under your own brand. You'll be responsible for choosing and marketing those products. Plus, you'll also be responsible for managing customer inquiries and complaints.

Lastly, in the dropshipping business model, the customer buys the products directly from you the retailer. If questions or issues arise, they contact the retailer they bought the product from.

Why Is Starting a Dropshipping Business a Good Idea?

A dropshipping business is a low risk business model. When it comes to product costs, you only pay for products that you sell to paying customers. You don't become overburdened with the cost of creating products, carrying inventory, costs of maintaining unsold inventory, and the cost of employees for packaging and shipping products. It's a great entry into entrepreneurship as you can start your own dropshipping business by yourself during your evenings and weekends. It will require daily work when it comes to processing orders each day. However, most of the order processing steps are automated and require a click of a button. The dropshipping business opportunities are endless, you just need to take the first step.

Okay!

I don't want to bore you all with lots of talks

So let

your

Just

you

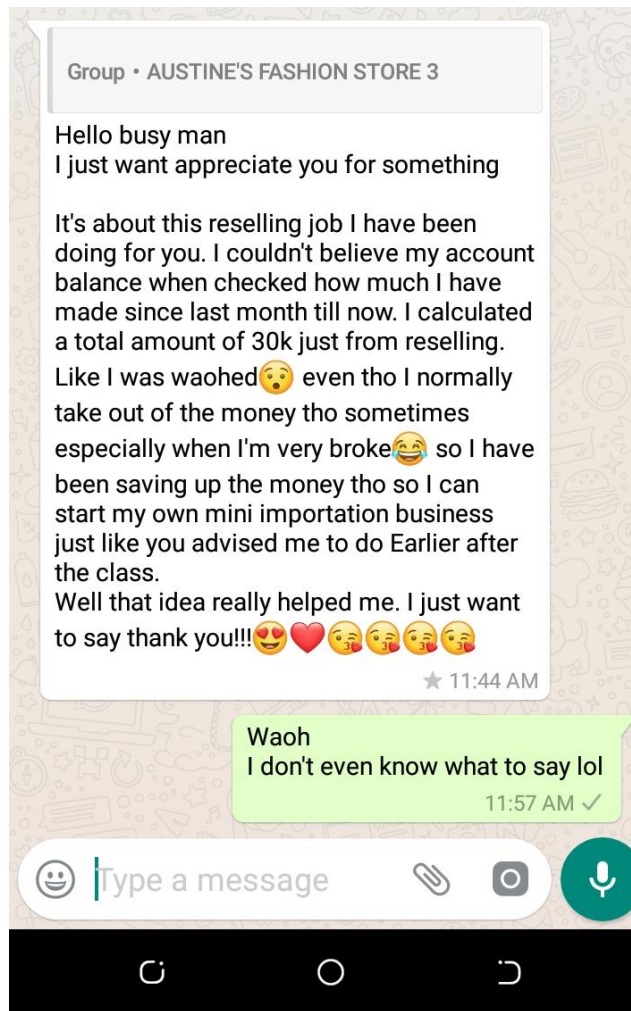

send

This

I have

too

profit

me summarize it here👉👉👉👉

Dropshipping is all about ordering a product online and shipping it directly to customers address. Meaning the goods doesn't necessarily have to get to you before it gets to your customers

let them know you have a product and help them other from any online e-commerce store then this website will it to your customer after providing their address tho

brings us to my Reselling busines

about 600 People doing this reselling busines, a lot of them are my students from mini importation. All they do is repost my goods and then add their own then they resell to people

So here's a testimony from my student who started this dropshipping business with me, I call them Resellers.

She started a month ago and she was able to gather enough money 30k to start of her own mini importation business

If you want to be part of my Resellers you can message me privately and get the link to the group

Now let me talk about the second aspect

Pre-order

Pre-order is just a method of mini importation whereby you use other people's money to to Import your goods

What this means is that, you go to the site, download pictures you feel your customers might be interested in, then upload for them to see and whoever is interested will message you then you they pay upfront before they get the goods. You repeat the same thing over again until you gather enough money to Import the items for your customers

Let me explain better.

First of get the goods you want to advertise, then show to your supposed customers. Then they pay upfront, before you gather all the money and import

NOTE: pre-order prices are always cheaper and lesser to when the items are on ground

You don't expect people to pay you for something they will still wait for about 14days to get at the same price as when you have it on ground. So it's the cheapness that attracts customers to doing pre-order with you.

Make your prices as cheap as possible.

You can create a group chat and add people to your pre-order group.

If you can't go with pre-order, then do dropshipping. Use me as your wholesale supplier and resell my products as you make your own profit

How to import yourself without the use of an agent

You can do this by using a site called chrisvicmall

What's chrisvicmall?

Buy from China 1688.com, taobao.com, aliexpress.com with ease.

We are China procurement and shipping agent that help people to purchase product from China websites like www.1688.com, www.taobao.com, www.aliexpress.com, www.alibaba.com, etc. We can also help to pay your Chinese supplier. We purchase and ship to any destination in the world. Your order processing starts immediately after you made payment and place your order.

Our recommendation:

If you are a retailer who plan to resale on Ebay, Amazon, offsite store, etc, always source your items from 1688 which is also known as Alibaba Chinese version. It is the best website you can buy things at cheaper price.

Click here to access the site [Chrisvicmall](#)

I made a video on how to navigate the site here

[Click here](#) and watch directly

Make sure you watch it directly on my blog if you find it difficult to download

How to sell on Jumia

To sell on Jumia is easy as abc. As long as you have your products on ground Already no problem

[Click here](#) to register as a seller on Jumia

Just follow the instructions and you are good to go

CONCLUSION.

“The difference between the successful and the failure is action.”

Thank you for buying and reading this book. I hope you didn't miss any point and you got value for your money?

I've shared the skills and strategies that have worked for me, my students and others, but no one can help you more than yourself. If you want a change, you must act.

You have invested by buying and reading this book. Thank you, but all of this will amount to nothing if you do not take any action or use the lessons learned. The action plans here are simple. LEARN IT, DO IT AND SELL IT.

Cheers!

How to invest your first N50,000- N100,000

If you are just starting out or you have saved N100,000 in a bank account and you need to invest this money into something, here is my advice on how you can go about it. This is not a professional advice and you can either take it or sieve it..

*** 1. Invest in yourself.***

This looks so simple and common sense but most people don't do it.

The most important investment you can ever make is the investment in yourself.

This is the only investment that can truly guarantee you 1000% returns.

Why's that?

The better you become, the more money you can make.

Every other can be stolen from you but the investment in self cannot be taken away.

Most people don't know that more money follows competence, courage and consistency. The better you become, the more money you can make.

*** 2. Learn a high income skill ***

There is a difference between a high income job (like shell), a high income profession (like Medicine) and a high income skill (like copywriting, Web design, Graphics design, mini importation etc)

The first two requires longer time, training and resources. The last ones can be learnt in days, weeks or months and the rewards are equal.

Believe it or not, there are programmers (high income skill) who earn a lot more than lawyers (high income profession)

My advice number is, learn a high income skill that can help you fetch more money.

Invest in courses and trainings. You can take my mini importation or graphic design/3d video animation class where I teach all you need to know and how to apply it and make good cash.. The link to join is at the end of the article..

*** 3. Create daily streams of income. ***

Daily streams of income are businesses that bring in cash on a daily basis. Even if it is 1k a day, it is better than nothing or waiting at the end of the month.

The most common daily streams of income are selling products online, you can join my group of Resellers and make cool money daily just by reposting our Fashion products. DM for link if interested

I have 3 daily streams of income. I sell digital products, I do digital trainings and I sell Fashion products like sneakers and the rest

For example, I paid N8,000 to learn mini importation, paid 8500 to Learn graphic design and in 3 months I made more than times 20× of my Investment on those courses from that one stream alone. (The good news is, I could teach you any of this training for N5, 000 or you can just get my ebooks on them, meaning you wouldn't have to pay for any online digital training on mini importation or graphic design/3d video animation)

*** 4. Start a supplementary business***

Supplementary businesses are businesses you start by leveraging an already existing business or traffic.

For example and this is very basic, if someone is selling akara, partner with them so that they can sell bread on your behalf. That's just the idea.

Look for where the traffic is and leverage on it.

It is a model I've used over and over to reap passive streams of income.

*** 5. Invest with Piggyvest***

I don't work for piggyvest. I just love the app and I am a loyal user. Piggyvest gives 13% returns if you lock your money with them for 1 year.

The interest is given upfront and you can withdraw the interest ASAP. I have some funds locked with them as we speak.

Also, the app is great for autosaving your salary or income. Let me stop here, you want to learn more about piggyvest, google them or use this link (<https://piggyvest.com/l/8e73b36>)to create an account, you will get N1,000 extra when you use the link to register. [click here to register on piggyvest](#)

That's it, if you need more clarifications about anything I've said above, you can hit me up on whatsapp: 09035345593
